

# Jaykumar Taravia

Gandhinagar, Gujarat

8530557470 | jaytaravia@gmail.com | github.com/Jayt257

## Technical Skills

---

**Languages:** C++ , Kotlin , Java , JavaScript , Python , HTML , CSS , MySQL

**Technologies/Frameworks/Libraries:** NodeJs, Retrofit , Hilt , Room , Picasso , AndroidKTX

**Tools:** Android Studio , IntelliJ , VS code , Git/Github , Postman API , Docker

**Other:** Problem Solving and DSA(Data Structures And Algorithm)

## Education

---

**Pandit Deendayal Energy University ( Formerly PDPU )**

*Bachelor of Technology in Computer Engineering(CGPA of 9.81)*

## Courseworks

---

- Computer Networks
- Design And Analysis of Algorithms
- Operating System
- Database Management System

## Projects

---

**News App** | Java, Retrofit, News API, JSON

- It is a News app that provides different sections for different types of news topic.
- It redirects to web-site or blog of that news article when clicked on any news.

**Chat App** | Kotlin, Firebase

- It contains login and logout using firebase.
- It enables users to send and receive messages in easier, simpler, and faster way to connect with everyone and it is also easy to use.

**Notes App** | Kotlin, MVVM, Room Database

- It displays the list of notes in RecyclerView which is added by the user and user can delete note.
- Time when user created note or last updated is displayed below title of note.
- It uses Room Database for storing user's content.
- It is built using MVVM architecture.

**Weather App** | Kotlin, Retrofit, OpenWeather API, View Binding

- It displays various information of city related to weather like temperature, Pressure, Humidity, Sunrise time, Sunset time, Wind speed, etc.
- It contains search option to view any city's weather.

## Leadership and Involvement

---

**ACM PDEU Student Chapter ( January 2023 - Current )**

*Android developer*

- Worked as a fullstack android developer while developing app which was based on Kotlin, Firebase.
